# NEWSLETTER

**October 16-31, 2005**

# STATE CLEARINGHOUSE NEWSLETTER

The State Clearinghouse distributes draft environmental documents to state agencies for review and comment, pursuant to the California Environmental Quality Act (CEQA). The State Clearinghouse also acts as the State Single Point of Contact for the review of federal grant applications and federal development projects. This Newsletter summarizes the environmental documents and federal grant applications received by the Clearinghouse during the period **October 16-31, 2005.**

## CLEARINGHOUSE CONTACTS

Please contact The State Clearinghouse if you have any questions regarding processing of environmental documents or grant applications. We may be reached at:

Telephone: (916) 445-0613  
Fax: (916) 323-3018  
e-mail: [state.clearinghouse@opr.ca.gov](mailto:state.clearinghouse@opr.ca.gov)  
website: [www.opr.ca.gov/clearinghouse/clearinghouse.shtml](http://www.opr.ca.gov/clearinghouse/clearinghouse.shtml)

Questions regarding federal grant notices should be directed to **Sheila Brown**.

Questions regarding processing of environmental documents should be directed to:

**Scott Morgan**  
Senior Planner

## CLEARINGHOUSE MAILING ADDRESS

Please do not use our street address (1400 Tenth Street, Room 212) for mailing purposes. The correct mailing address is:

STATE CLEARINGHOUSE  
P.O. BOX 3044  
SACRAMENTO, CA 95812-3044

## INFORMATION AVAILABLE ON-LINE

The 2001 CEQA Guidelines are available from the Resources Agency's website at <http://ceres.ca.gov/ceqa/>.

The State Clearinghouse Handbook, which contains all of our environmental document and grant processing procedures and forms, is available on our website.

## MEMORANDUM

### Governor's Office of Planning and Research State Clearinghouse

**Date:** December 5, 2003

**To:** All CEQA Lead Agencies

**From:** Terry Roberts, Director, State Clearinghouse

**Re:** Submission of Electronic CEQA Documents to State Clearinghouse

In order to take advantage of the cost and time savings associated with electronic documents, the State Clearinghouse will accept electronic documents under the following conditions:

1. Electronic documents shall be on CD, and the file format shall be either Adobe PDF or Microsoft Word.
2. For EIRs, each CDs must be accompanied by a printed copy of the Executive Summary. This allows the State Clearinghouse and the reviewing agencies to efficiently route the document to the proper persons.
3. Negative Declarations and Mitigated Negative Declarations will not be accepted on CD. However, any separately bound technical appendices to the document may be submitted on CD.
4. For certain projects, particularly large infrastructure projects such as airport expansions, the State Clearinghouse may request a certain number of hard copies. In addition, the lead agency shall honor a special request from a responsible or trustee agency which requires a hardcopy for purposes of review and comment.
5. This policy does not invalidate CEQA Guideline §15205, which requires a public agency submitting printed documents to the State Clearinghouse to send, in addition, an electronic copy of the document, *if available*.

If you have any questions regarding the submission and circulation of environmental documents, please contact the State Clearinghouse at (916) 445-0613 or [state.clearinghouse@opr.ca.gov](mailto:state.clearinghouse@opr.ca.gov).

<b><u>Documents Received on Monday, October 17, 2005</u></b>			
2003022113	<p>Bidwell-Sacramento River State Park Preliminary General Plan Parks and Recreation, Department of --Butte, Glenn</p> <p>The proposed project consists of the development of a new General Plan for Bidwell-Sacramento River State Park. The General Plan will guide future management direction at the Park over an approximate 20-year planning horizon. The General Plan contains a comprehensive and integrated set of park-wide goals and guidelines for the long-term management of the Park that focuses on protection of environmental resources, enhancements to visitor use and opportunities, and improvements to administration and operations of the Park. In addition, the General Plan provides a spatial dimension to Park planning through the use of area concept planning, which includes area-specific management and facility prescriptions for the subunits and potential property additions that have been considered in the planning process. A range of new recreation facilities are proposed at the Park, which include, but are not limited to, overnight campgrounds, day-use areas, trails, and a visitor center.</p>	<b>EIR</b>	11/16/2005
2004122032	<p>New South Yuba City K-8 School Yuba City Unified School District Yuba City--Sutter</p> <p>Construct a new school serving 900 K-8 students on existing District-owned land, with attendant street frontage improvements on Stewart Road and Garden Highway.</p>	<b>EIR</b>	11/30/2005
2005081158	<p>Oxnard Harbor District Vehicle Handling and Distribution Facility Oxnard Harbor District Port Hueneme--Ventura</p> <p>The Oxnard Harbor District is proposing to construct of two open, paved areas to be used as a handling site for interim storage and distribution of vehicles from the Port of Hueneme. Site A would be developed as the larger, primary facility with access from East Port Hueneme Road. At Site B, the recent Waggoners truck parking area and adjacent boat repair facility would be developed into a smaller secondary vehicle handling and distribution facility with access primarily from Industrial Avenue.</p>	<b>EIR</b>	12/05/2005
2003041001	<p>San Diego Downtown Community Plan, Centre City Planned District Ordinance and Redevelopment Plan for the Centre City Project Area San Diego, City of --San Diego</p> <p>The project consists of a series of revisions to the planning documents which govern downtown San Diego. The following documents would be amended: San Diego Downtown Community Plan, Centre City Planned District Ordinance and the Redevelopment Plan for the Centre City Project Area.</p>	<b>FIN</b>	
2004082078	<p>Hudson Vineyards #99376-ECPA ('Carneros' Ranch) and #03376-ECPA ('Moorehouse' Ranch) Napa County --Napa</p> <p>The purpose of the Hudson Vineyards #99376-ECPA and #03376-ECPA project is to develop approximately 102.5 acres of new vineyard on two adjacent properties located along Henry Road in the Carneros region of Napa County.</p>	<b>NOP</b>	11/15/2005

<b><u>Documents Received on Monday, October 17, 2005</u></b>			
2005072152	On-Circulation Improvement Project Foothill-De Anza Community College District Cupertino--Santa Clara Demolish a historic cottage to construct a portion of the realigned campus loop road. The cottage is eligible for listing on the National Register of Historic Places.	<b>NOP</b>	11/15/2005
2005101070	Madera Town Center Madera, City of Madera--Madera The proposed project is the development of a retail "power center" and will be approximately 791,630 square feet of gross floor area located on a 100 acre site. The project will be constructed in two phases with 626,630 square feet of development in Phase 1 and 165,000 square feet of development in Phase 2. The retail "power center" will be grouped around one large main parking area and several small parking areas. Building heights are expected to range between 12 and 40 feet with building setbacks in the range of 35 to 50 feet. Store frontages will vary between 30 feet and several hundred feet. The retail "power center" will be equipped with rear loading facilities. The project will require construction of off-site utilities. Sewer and water lines will be extended from south and west of the project site. Schmidt Creek will be re-channeled along the northern boundary of the property to improve drainage, and a retention basin will be constructed on-site to hold excess storm water run-off.	<b>NOP</b>	11/15/2005
2005102066	UC Davis Medical Center Cancer Center Expansion Project University of California, Regents of the Sacramento--Sacramento The proposed Cancer Center Expansion would be a new approximately 46,000 gross-square-foot, three-story building adjacent to the existing Cancer Center building at 45th and X Streets at the UC Davis Medical Center. The new building would provide space to consolidate cancer treatment services on campus and would house clinical services, including pediatric oncology and additional clinic and chemotherapy infusion services and pharmacy. An additional 9,000 gsf of the existing Cancer Center's first floors would be remodeled to expand clinical laboratory, the outpatient pharmacy, and provide additional space for academic and administrative offices and support operations. A pedestrian bridge on the second level would link the existing Cancer Center with the proposed new building. The project is expected to add 83 new staff and 96 outpatient/infusion patient visits to UCDMC on a daily basis.	<b>NOP</b>	11/15/2005
2000111050	Special Use Permit No. PSP 00-036 (ZA) Tulare County Resource Management Agency --Tulare Special Use Permit approval to allow an agricultural services facility (commercial truck wash for livestock hauling trucks and trailers and a 5,000 sq. ft. shop building) on a 2.3 acre portion of a 26.7 acre parcel.	<b>Neg</b>	11/15/2005
2005101071	Cornell-Dubilier Electronics/4144 Glencose Avenue Site Toxic Substances Control, Department of Los Angeles, City of--Los Angeles The site is contaminated with polychlorinated biphenyls (PCBs), tetrachloroethene (PCE), and trichloroethylene (TCE). The Draft RAP includes a remedy consisting of Selective Soil Excavation and Electrical Resistive Heating, followed by groundwater monitoring. A deed restriction will accompany the remedy.	<b>Neg</b>	11/15/2005

<b><u>Documents Received on Monday, October 17, 2005</u></b>			
2005101072	16-Unit Commercial Condominium Project at 727 2nd Street Hermosa Beach, City of Hermosa Beach--Los Angeles Conditional Use Permit, Precise Development Plan and Vesting Tentative Tract Map No. 064484 for a 16-unit commercial condominium project.	<b>Neg</b>	11/15/2005
2005101073	Art Smith Trail to Mirage Trail Palm Desert, City of Palm Desert--Riverside This project involves the construction of trail segments to complete the Art Smith Trail re-route and the Hopalong Cassidy Trail, Segments of these trails already existing: portions of the existing "southern" Schey and Canyon Trails will be incorporated in the Art Smith Trail reroute; and portions of the existing "northern" Schey Trail and Hopalong Cassidy Trail at Homme-Adams Park will be incorporated in the completed Hopalong Trail from the Art Smith Trail to the Mirage Trail in Rancho Mirage.	<b>Neg</b>	11/15/2005
2005101074	San Diego Creek Interim Maintenance of Basins No. 1, 2, and 3 Orange County Newport Beach, Irvine--Orange The project would involve dredging and vegetation removal activities within Sediment Basin No. 1, 2, and 3. Specifically, activities within Basin 1 involve the removal of vegetation from the west bank and the hydroseeding of the side slope following all sediment removal in Basins No. 2 and 3. Activities within the channel and sediment basin would include vegetation and sediment removal and hydroseeding of both side slopes and the removal of exotics within the remaining 40-foot buffer zone. The proposed project is anticipated to enhance water quality by reducing the annual sediment loading to Newport Bay as well as restore the conveyance capacity of San Diego Creek.	<b>Neg</b>	11/15/2005
2005101075	FoodsCo Gas Station Santa Maria, City of Santa Maria--Santa Barbara Planned Development Permit application to allow the construction of a gas station with 5 pumps (10 fueling stations) with a cashier/kiosk. The gas station canopy is approximately 4,950 square feet.	<b>Neg</b>	11/15/2005
2005101076	Tentative Tract Map 33720 Perris, City of Perris--Riverside Proposed Tentative Tract Map to subdivide 11.9 acres into 57 lots for single family residential development in the R-6,000 Residential zone (minimum 6,000 square foot lots), with a proposed minimum lot size of 7,000 square feet and an average lot size of 7,434 square feet.	<b>Neg</b>	11/15/2005
2005102061	Oakwood Lakes Subdivision San Joaquin County Manteca, Lathrop--San Joaquin A five year time extension request for an approved Major Subdivision for 480 single family lots.	<b>Neg</b>	11/15/2005

	Heron RV Park (Z-90-03), which are on the same property. The Use Permit would not apply to the portion of the property that is under entitlement of the Planned Development (Z-90-03).		
2005071087	<p>San Francisquito Canyon Blow-Off Structure Access Road and Pad Reconstruction Project</p> <p>Metropolitan Water District of Southern California</p> <p>Santa Clarita--Los Angeles</p> <p>The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2005-0544-R5 pursuant to Section 1602 of the Fish and Game Code to the project applicant, the Metropolitan Water District of Southern California. The operator proposes to alter the streambed by reconstructing a washed-out access road and crane pad immediately adjacent to the Metropolitan's San Francisquito Canyon Blow-off structure, located along the eastern bank of San Francisquito Creek on an area previously a terrace. Reconstruction of the access road and pad would occur within a footprint of approximately 0.3 acres. Terra aqua PVC Coated Gabions would be placed and buried within a terrace of San Francisquito Creek.</p>	<b>NOD</b>	
2005071135	<p>Magnolia Production Well Development Program</p> <p>Big Bear Lake, City of</p> <p>Big Bear Lake--San Bernardino</p> <p>The proposed Magnolia production well would allow increased well pump cycling so that existing DWP wells could be turned off or rested more frequently, thereby reducing localized water table drawdown associated with pumping. The proposed production well would also serve to replace production lost because existing wells have been removed from production for maintenance, water quality or other reasons. The proposed production well location has been selected based upon water bearing potential, results of test well drilling and water quality sampling. The proposed well is expected to yield between 100 and 300 gpm but to be active 56% of the time such that it would be equivalent to yielding between 56 and 168 gpm. The proposed well would thus yield 90 to 270 acre-feet/year. Thus, the combined existing and proposed water extraction would total approximately 580 acre-feet/year.</p>	<b>NOD</b>	
2005072079	<p>Carpy-Conolly Vineyard Conversion Project #02227-ECPA</p> <p>Napa County</p> <p>St. Helena--Napa</p> <p>The project includes earthmoving activity associated with development of a new vineyard, including installation of erosion control measures as detailed in Erosion Control Plan # 02227-ECPA. Slopes range from 5% to 34%, with an average slope of 21%. Approximately 0.91 acres would occur on slopes greater than 30%. Grading would consist of land smoothing, ripping, and disking. There would be no off-site spoils. Water would be available from an existing on-site reservoir and a draitile system. Erosion control plan #02227-ECPA has been prepared and includes silt fencing, straw mulch, diversion ditches, drop inlets, rock slope protection and permanent no-till cover crop. Total area proposed for the vineyard project is 10.7 +/- acres on a 115-acre parcel on the north side of Conn Creek Road (SR 128) approximately 1/2 mile west of its intersection with Silverado Trail. The parcel is located in an Agricultural Preserve (AP) zoning district, with a Napa County General Plan designation of Agricultural Resource. Access is provided by an existing dirt road off of Conn Creek Road (SR 128). No future projects are anticipated for the parcel at this time.</p>	<b>NOD</b>

2005082127	602 Water Tank Replacement Project Calaveras County Water District --Calaveras Construction of a 200,000-gallon elevated steel water storage tank and removal of an existing 139,000-gallon steel tank.	<b>NOD</b>	
2005109019	Carmel River Management Plan: Vegetation Clearing / Routine Maintenance Agreement Monterey Peninsula Water Management District --Monterey The Carmel River supports important fish and wildlife habitat, including that of federally listed southern steelhead and California red-legged frog, as well as southwestern pond turtle. In brief summary, the activities authorized in this agreement may include some forms of sediment and silt removal, vegetation management, repair of existing bank protection, minor activities to clear channel obstructions, and some forms of habitat enhancement. This agreement is not intended to cover larger-scale efforts that may remove significant amounts of large woody debris (LWD) from the river corridor. The project would occur between River Mile (RM) 0.0 (at the Carmel River lagoon) and extend upstream to approximately RM 18.6 at the San Clemente Dam. CEQA review is from a 1984 document that was drafted prior to the listing of the steelhead and California red-legged frog, but biological Opinions from both NOAA Fisheries and the U.S. Fish and Wildlife Service (Regional General Permit for River Maintenance and Restoration on the Carmel River, Monterey County, California, No. 24460S (1-8-03-F-45)) have been obtained for the work.	<b>NOD</b>

2005109021	RP-5 Renewable Energy Project, Manure Digester Inland Empire Utilities Agency Chino--San Bernardino The project consists of a Phase II digester system that will use dairy manure and food waste material to generate biogas. The manure and food waste will be delivered to the existing received facility, transferred to the new digesters, and biogas then delivered to the power generation units at the RP-5 site.	<b>NOD</b>	
2005109022	RP-5 Renewable Energy Efficiency Project Inland Empire Utilities Agency Chino--San Bernardino The REEP project consists of a series of full scale demonstration projects that include innovative combinations of primary and secondary generation systems using methane gas derived from local processing of biosolids, dairy manure and other organic material. This facility includes three 1,500 kW capacity generator sets that will use either natural gas or digester gas in a cogeneration system.	<b>NOD</b>	

## CEQA Daily Log

Documents Received during the Period: 10/16/2005 - 10/31/2005

SCH Number	Title / Lead Agency / City--County / Description	Document Type	Ending Date
<b><u>Documents Received on Monday, October 17, 2005</u></b>			
2005109023	Hollister Road Bridge Replacement Project San Luis Obispo County Community College District --San Luis Obispo Replacement of the existing Hollister Road bridge crossing over Chorro Creek. The project would proceed in four main phases: (1) diversion and dewatering of Chorro Creek; (2) demolition of existing bridge structure and preparation of project site; (3) construction of new bridge structure; and (4) site restoration.	<b>NOD</b>	
2005108278	City of Lodi Outfall Structure Repair for 2005/2006 Lodi, City of Lodi--San Joaquin The Public Works Dept. will be doing minor maintenance work on the city's outfall structures along the Mokelumne River. This will include clearing non-native vegetation and debris, repairing pipes, grouting cracks and placement of riprap in limited locations. Work will be done by hand.	<b>NOE</b>	
2005108283	Invasive Plant Removal in Management Areas Fish & Game #5 Carlsbad--San Diego Eucalyptus trees and shrubs will be eradicated throughout the Reserve by first using state approved herbicide and later felling trees and shrubs. Biomass from activity will be disposed of either by chipping, left in place as erosion control or taken offsite. The small stands of eucalyptus pose a fire hazard and inhibit native vegetation growth due to the build up of alleopathic leave litter below the trees and shrubs. A current Form 880 (standard Pesticide Use Recommendation Form) for the selected herbicide is on file. Sawyers from California Department of Forestry and Fire Prevention (CDF) and will be used to safely fell trees. All vegetation maintenance will be conducted in a manner that will not be in conflict with Reserve rules and regulations or other regulatory requirements. No biological or cultural resource impacts will occur from this project. Native wildlife including the California gnatcatcher will benefit directly from this restoration activity.	<b>NOE</b>	
2005108284	Concrete Encasement Under State Route 60 Widening Water Resources, Department of, Division of Engineering --Riverside Excavation above and below springline of the pipe, concrete encasement, backfill of the encased pipeline, and land restoration.	<b>NOE</b>	
2005108285	Southern California Gas Company Ventura County Storm Repairs Fish & Game #5 Thousand Oaks, Calabasas--Ventura Repair four storm damaged sections of a natural gas pipeline in Ventura County. Repairs include placing a rock guard on the pipe, backfilling exposed sections of pipe, replacing a damaged culvert, and revegetating work areas with native vegetation. SAA# 1600-2005-0377-R5	<b>NOE</b>	
2005108286	Shea Homes Debris Basin Maintenance Fish & Game #5 Calabasas--Los Angeles Conduct routine maintenance on two debris basins in Tentative Tract Map 53534. SAA# 1600-2005-0250-R5	<b>NOE</b>

<b><u>Documents Received on Monday, October 17, 2005</u></b>			
2005108287	Centex Homes Reino Road Project Fish & Game #5 Thousand Oaks--Ventura Alter the streambed to a culvert for the project.  SAA# 1600-2005-0474-R5	NOE	
2005108288	2005-154 Proposition 50 Grant Application Murphys Park West Calaveras County Planning Department Murphys--Calaveras The proposed project entitled Murphy's Park West, is intended to restore a parcel of County owned land (formerly mill and mining site and subsequently occupied by the State of California, California Division of Forestry as a fire station) into a Community Park and native wetlands area.	NOE	
2005108289	Honker Heaven Habitat Restoration and Enhancement Project Regional Water Quality Control Board, Region 6 (Lahontan), South Lake Tahoe --Lassen The project proponent plans to enhance wetland-associated uplands, and restore riparian habitat to prolong the duration of water retention in the wet meadows, resulting in enhanced conditions for shorebirds and waterfowl during spring and fall migrations.	NOE	
2005108290	Willow Creek Wildlife Area Habitat Restoration Project Regional Water Quality Control Board, Region 6 (Lahontan), South Lake Tahoe Susanville--Lassen The project proponent plans to restore and enhance seasonal wetland habitat and upland habitat within a State Wildlife Area which is owned and managed by the California Department of Fish and Game.	NOE	
2005108291	Prado Wetlands Reconstruction Regional Water Quality Control Board, Region 8 (Santa Ana), Riverside Corona--Riverside The project proposes to reconstruct 465 acres of wetlands in the Prado Basin. Following the construction of the Prado Dam in 1941, the Wetlands were originally constructed by duck hunting enthusiasts in the 1970's. Orange County Water District (OCWD) began formally operating the wetlands to remove nitrates and other pollutants from Santa Ana River flows in 1993. The Wetlands were severely damaged and rendered inoperable after the Santa Ana River meandered through them during a storm-induced flow during the 2004-2005 rain season. The wetlands will be reconstructed within their original footprint.	NOE	
2005108292	Hall Drive Slide Restoration, District Project No. 5558 Fish & Game #3 Orinda--Contra Costa Abandon an existing manhole and sewer running parallel to a creek and repair a slide downhill of the manhole. Issuance of a Streambed Alteration Agreement Number 1600-2005-0546-3 is pursuant to Fish and Game Code Section 1602.	NOE	
2005108293	Shore/Charter Bridge Replacement Fish & Game #3 --Sonoma The project involves the installation of a replacement bridge on a unnamed tributary to McKenzie Creek, tributary to Austin Creek, tributary to the Russian River in Sonoma County. The California Department of Fish and Game is executing a Lake and Streambed Alteration Agreement number 1600-2005-0529-3 pursuant to	NOE

SCH Number	Title / Lead Agency / City--County / Description	Document Type	Ending Date
<b><u>Documents Received on Monday, October 17, 2005</u></b>			
	Section 1602.		
2005108294	Crystal Ranch East Creek Bank Slump Repair Fish & Game #3 Concord--Contra Costa Repair of a creek bank slump, install new subdrain and rock rip rap, restore creek bank and plant with natural grasses and willows. Issuance of a Streambed Alteration Agreement Number 1600-2005-0550-3 is pursuant to Fish and Game Code Section 1602.	<b>NOE</b>	
2005108295	Castrol Shoreline Stabilization Project Regional Water Quality Control Board, Region 2 (San Francisco Bay), Oakland Richmond--Contra Costa The project proposes to place engineered riprap to stabilize 360 linear feet of shoreline along the Santa Fe Channel within the Richmond inner Harbor to prevent erosion.	<b>NOE</b>	
2005108296	Emergency Bridge Rail Replacement Caltrans #1 Ferndale--Humboldt This is an emergency Structure Maintenance Project resulting from a collision that occurred August 17, 2005 in Humboldt County near the town of Ferndale at the Eel River Bridge (Fernbridge) No. 04-0134. While the temporary, emergency railing was being placed, engineers inspecting the damaged rail revealed previously unknown structural deficiencies. Original rail construction of Fernbridge included 6 reinforced bars (rebar) in each post that were anchored to the bridge deck adding tensile strength to the concrete. The accident brought to Caltrans attention the significant loss of reinforcing steel within the guardrail, leaving 1-2 rebars out of the 6 in each post. With no significant steel in the concrete, the ability of the railing to absorb energy during a collision is limited. In addition the age of the concrete makes is susceptible to crumbling and deterioration. Fernbridge experiences a large average daily traffic and has only 9.0-ft. wide lanes with 0.5-ft. of temporary railing at the damaged location. The lack of steel in the rail combined with the condition of the concrete indicates that immediate action is necessary to provide a safe conveyance for traffic. Local support for complete replacement of the railing is high, and of great interest to those who travel the bridge on a daily basis. Failure to act on this known safety concern would place the motoring public at risk.	<b>NOE</b>	
2005108297	Safety Project at Rock Chute Viaduct Caltrans #1 --Humboldt This is a safety project to construct new metal beam guard rail (MBGR), reconstruct MBGR, install MBGR, install concrete barriers, and construct a retaining wall. The existing highway through the project limits consists of a narrow two-lane facility with 0.3-0.9-meter shoulder, and is located on steep mountainous terrain with the Trinity River west of the roadway below the southbound lane. The project has been initiated as a safety project in response to a review of vehicle accidents.	<b>NOE</b>	
2005108298	ADA Parking Stalls Compliance Caltrans #1 --Del Norte, Humboldt This project will involve the re-paving and striping of parking stalls, and the designation of handicapped parking stalls and sign installation. There are no known sensitive biological, archaeological, or hazardous material sites within the	<b>NOE</b>

2005108361	School House Bookcase Parks and Recreation, Department of Hollister--San Benito This project will protect the books in the display bookcase by enclosing the case. The bookcase will be enclosed using a piece of Plexiglas placed over the front of the case and secured with screws so that it can be periodically removed and the display changed and cleaned. The Plexiglas will have small holes in the front to allow the bookcase to breathe and will not break as glass would. The bookshelves will be lined with cedar paneling to control insects, such as silverfish. The cedar paneling will be attached in such a way that it can be removed, if necessary, without injury to the bookcase. The bookcase is attached to a wall of the school house, so rodents will not be able to get in from the back and the public can not move it. Making these modifications will protect the display books, which are as old as the School House and were used by students who attended the school.	NOE

2005082063	New Elementary School #2 and Residential Subdivision Vacaville Unified School District Vacaville--Solano The project site contains two land parcels totaling about 20.58 acres. Parcel 1 contains about 10.57 acres and parcel contains about 10.01 acres. A new elementary school would be constructed on 11.16 acres. The school would contain 37,500 gross square feet. A 0.64 community detention pond would be located on the school site as mitigation for potential flooding. The project would also include obtaining entitlements from the City of Vacaville for a eight acre site containing 16 lots for single-family development.	<b>EIR</b>	12/01/2005
2004112108	901 San Antonio Road Palo Alto, City of --Santa Clara The proposed project would allow redevelopment of two sites totaling 12.5 acres in the City of Palo Alto. The northern four acre parcel is owned by BRIDGE Urban Infill Land Development (BUILD) and the southern 8.5-acre parcel (CJL Site) is owned by Campus for Jewish Life (CJL), a joint project/consortium of the Albert L. Schultz Jewish Community Center, the Jewish Community Federation and the Jewish Home. Several discretionary actions are proposed including a Comprehensive Plan amendment for the entire site, Planned Community (PC) zonings for the BUILD Site and CJL Site, and a major subdivision on the four acre BUILD parcel. A major subdivision is five or more new parcels or condominiums. Various for allowed building heights of up to 56.5-58 feet are also proposed.	<b>NOP</b>	11/16/2005
2005101081	8600 Wilshire Boulevard - Mixed Use Beverly Hills, City of Beverly Hills--Los Angeles This new mixed-use proposal includes 25 residential units, 4,800 square feet of commercial space, and 88 at-grade and subterranean parking. The portion fronting on Wilshire Boulevard (north side) would be approximately 62 feet high, and the portion front Charleville Blvd. (south side) would be approximately 38 feet high. The proposal requires general plan and zoning amendments and a planned development review permit.	<b>NOP</b>	11/16/2005
2005102067	Hop Kiln Ranch - GP 8-04/R 12-04/S 2-04/U 10-05/V 7-05/OA 3-05 Mendocino County Ukiah--Mendocino The applicants are requesting a number of entitlements (General Plan Amendment, Rezone, Ordinance Amendment, Subdivision, Use Permit to authorize one of two alternative development scenarios. One is primarily residential, with a 150 unit apartment complex, 91 town homes, 469 single family lots, 24 "live/work" units (commercial below, residential above, and park land. The other is a "mixed use" development, with a reduced number of single family lots and 100,000+- sq. ft. of commercial/retail space.	<b>NOP</b>	11/16/2005
2005102072	Howard Terminal Auto Procesing Facility Oakland, Port of Oakland--Alameda Construction activities would occur in an approximately 3-acre area at Howard Terminal, which is currently occupied by Matson. An automated structure capable of storing up to 2,000 autos would be built in the northeast section of the container yard. The main objective of the project is to relocate Matson's auto shipping service, formerly located at Berth 33, to Howard Terminal. Construction activities	<b>NOP</b>	11/16/2005

	rooms with a 7,000 to 15,000 square foot conference center; it would provide between 4,351 and 4,651 on-site parking spaces, including surface and multilevel parking spaces.		
2005042109	Provinsalia Golf Community Clearlake, City of Clearlake--Lake The project sponsor proposes to amend the City General Plan land use designation on the subject property from Resource Protection to Specific Plan, and to rezone the property from Resource Protection to Specific Plan. The applicant will prepare a Specific Plan to be adopted by the City to govern the development of this 292.2 acre project. The applicant proposes to develop a maximum of 720 residential dwelling units of varying densities, and a 9-hole golf course. Domestic water supply will be withdrawn from Cache Creek and treated onsite. Wastewater collection and treatment will be operated by the County of Lake Special Service District.	<b>EIR</b>	12/07/2005
2004112060	Cochrane Road Planned Unit Development (PUD) EIR Morgan Hill, City of Morgan Hill--Santa Clara The Cochrane Road Planned Unit Development (PUD) project (hereinafter "proposed project") would include two large anchor stores, retail shops, restaurants (sit-down and fast-food), and a multi-plex cinema with up to 14 screens. The proposed anchor stores could consist of the relocation and expansion of the 'Target' store (currently located at the Cochrane Plaza shopping center) and construction of over 530,000 square feet of additional retail, which could include a home improvement store, wholesale store or department store; retails shops; restaurants (sit-down and fast food); and a 63,200 square foot multi-plex cinema with up to 14 screens. The proposed project includes an optional 12-position fuel station that would incorporate a 1,600 square foot convenience market and a 600 square foot car wash as a substitution for 6,000 square feet of retail space. Although a cinema is shown on the site plan, it is speculative at this time. Nonetheless, a cinema was included in the EIR analysis to represent a worst-case scenario.	<b>FIN</b>	
2005101099	Valentine Trust Tentative Parcel Map; TPM 20710, Log No. 02-02-033 San Diego County Department of Planning and Land Use Fallbrook--San Diego The project proposes a tentative parcel map for a 5.36-acre parcel in the Fallbrook community. The split would create four parcels, a remainder parcel, each with graded pads for single-family residences, and an access road. The project proposes 5,000 cubic yards of soil to be moved in the grading of the pads and access road. The project site will gain access via Oak Glade Drive.	<b>MND</b>	11/21/2005
2005102083	Parcel Map 05-51 Tehama County Planning Department Chico--Tehama To subdivide an existing 359.26 acre parcel and create two 179.63 acre parcels.	<b>MND</b>	11/21/2005
2005102085	Camden Place Citrus Heights, City of Citrus Heights--Sacramento Division of 6.5 acres into 66 lots for single family homes and half-plexes. Includes a rezoning to a special Planning Area, a tree permit, and a development plan review permit.	<b>MND</b>	11/21/2005

	to 24 horses. The proposed clinic would board up to 20 horses and the property owners would reduce the number of horses they board to be no more than 5 horses. Access to the proposed facility would be from an existing driveway off Haire Lane that also provides access to the existing horse boarding facility. A separate driveway off Haire Lane provides access to the existing single-family home.		
2005102087	Groveland Community Services District Water Treatment Plan Disinfection Modifications at Big Creek and Second Garrote Groveland Community Services District --Tuolumne The proposed facilities improvements would be located within the exiting boundaries of two water treatment plants (WTPs) operated by the Groveland Community Services District (GCSD). No residences are present on this site. No new residential development would be directly or indirectly caused by construction of the project. The proposed project would modify the disinfection system to meet future and proposed disinfection rules and allow for expanded flow capacity identified in the current water treatment operations plan. The proposed project would not change the current WTP footprint or general configuration, except for the Second Garrote facility northwestern corner fence line, which will be relocated approximately 25 ft. to the west to allow for installation of the new aqueous ammonia tank and UV disinfection building. No additions will be outside of the current property boundaries or the General Plan area for WTP facilities.	<b>Neg</b>	11/21/2005

2005102099	Parcel Map #05-44, Jerry Jackson Tehama County Planning Department --Tehama To create two parcels; one parcel of 24.5 acres and one parcel of 15.2 acres and a Life Estate parcel of .4 acres each in an EA-B:827; Exclusive Agricultural - Special Building Site Combining (827,000 sq. ft.; 19 acre minimum) zoning district.	<b>Neg</b>	11/22/2005
2005102100	U.P. #05-45, Pioneer Exploration, Ltd. (Viola L. Jensen, Surface Owner) Tehama County Planning Department --Tehama To establish as natural gas well, Victor Ranch #12-17, for production purposes in UA-AP, Upland Agricultural-Agricultural Preserve Zoning District.	<b>Neg</b>	11/22/2005
2005102101	Johnny Jacobs - Use Permit for a Rock Quarry - UP0611 Del Norte County Planning Department --Del Norte Begin rock quarry operation. Fifteen year quarry. Access from encroachment on State Highway 197.	<b>Neg</b>	11/22/2005
1997071010	Alton Avenue Overcrossing at State Route 55 Santa Ana, City of Santa Ana, Irvine--Orange Construction of an overcrossing on Alton Avenue/ Parkway over SR-55 with high occupancy vehicle (HOV) drop ramps, addition of a signalized intersection with the HOV ramps, widening SR-55 to accommodate median ramps, widening Alton Avenue, relocating an existing drainage channel, relocating two sections of Pullman Avenue, widening the Dyer Road undercrossing structure, and modifying existing ramps at MacArthur Boulevard and Dyer Road to connect with the widened freeway.	<b>NOD</b>	
2000021096	Dry Canyon Regional Stormwater Detention Facility Simi Valley, City of Simi Valley--Ventura The construction of a regional stormwater detention dam and facility. The proposed facility would detain 165 acre-feet of water and would reduce peak flow from 1,783 cubic feet per second to 190 cubic feet per second.	<b>NOD</b>	
2002091018	Canyon Hills Project Los Angeles City Planning Department Los Angeles, City of--Los Angeles Vesting Tentative Tract Map, Development Agreement, Major Plan Review, and Zone Change to permit the construction of 280 single-family homes to be clustered on approximately 194 acres of the 887-acre project site. Approximately 211 homes will be constructed on approximately 142 acres north of Interstate 210 (Development Area A). The remaining 69 homes will be constructed on approximately 52 acres south of Interstate 210 (Development Area B). Approximately 693 acres (78 percent) of the project site will be preserved as permanent open space.	<b>NOD</b>	

## CEQA Daily Log

Documents Received during the Period: 10/16/2005 - 10/31/2005

<b><u>Documents Received on Monday, October 24, 2005</u></b>			
2002101069	<p>El Paso Natural Gas Pipeline 1903 Conversion California State Lands Commission Blythe--San Bernardino, Riverside, Kern</p> <p>The project includes the conversion of approximately 88 miles of 30-inch diameter pipeline from a crude oil pipeline to a natural gas transmission pipeline. The project also includes construction of 6.4 miles of a new 30-inch interconnection pipeline. The project will impact approximately 132.20 acres of land.</p>	<b>NOD</b>	
2003121001	<p>The Springs Commercial Center Palm Springs, City of Palm Springs--Riverside</p> <p>Geiger, LLC, has proposed entering into a Disposition and Development Agreement with the City of Palm Springs Community Redevelopment Agency (CRA) to develop approximately 393,000 square feet of retail/commercial uses on approximately 37-acres of vacant land, located at the northeast corner of State Route 111 (more commonly known as Gene Autry Trail) and Ramon Road in the City of Palm Springs, California. The subject property is the site of a former landfill, which accepted predominantly household refuse and construction waste from the early 1930's until the mid 1960's. A Removal Action Workplan (RAW) has recently been completed for the site, which involved remediation of the buried refuse within the site and associated site restoration activities. The landfill material was removed, soil was mined from the basement and landfill material and mining material was re-deposited into a cell, recompact, and rough graded. Consequently, the project is considered a redevelopment project which proposes construction of a mix of commercial retail uses on site, including up to ten major commercial stores ranging in size from 14,700 to 117,200 square feet, 4 retail stores between 6,000 and 12,600 square feet, and 4 restaurants from 3,200 to 9,600 square feet. The proposed project is being pursued through a Planned Development District Permit (PDD) and Tentative Tract Map (TTM) and is consistent with the "floating dot" Neighborhood Convenience Center (NCC) General Plan land use designation located at the southwest corner of the project site.</p>	<b>NOD</b>	
2004061092	<p>Disposition of Offshore Cooling Water Conduits, SONGS Unit 1, San Onofre California State Lands Commission --San Diego</p> <p>Disposition of water cooling intake and discharge conduits offshore of the San Onofre Nuclear Generating Station, Unit 1 Facility, San Diego County, California.</p>	<b>NOD</b>	
2004082072	<p>Lawrence Final Map Subdivision Humboldt Community Services District --Humboldt</p> <p>Approval of a tentative map for subdivision of an approximate 1.17 acres into seven residential lots with the potential for development of primary and secondary dwelling units. The lots range in size from 5,146 to 7,578 sf. The subdivision is to be served by community water and sewer, and accessed via the westerly extension of Underwood Road. The subdivision proposes an underground drainage detention system along the access road to transmit stormwater runoff from the subdivision to a facility within the approved Morgan subdivision. The project requires an exception to lot frontage requirements and road width standards to allow for flag lot configuration and a 29-foot wide internal access road.</p>	<b>NOD</b>	

## CEQA Daily Log

Documents Received during the Period: 10/16/2005 - 10/31/2005

SCH Number	Title / Lead Agency / City--County / Description	Document Type	Ending Date
<b><u>Documents Received on Monday, October 24, 2005</u></b>			
2005041155	Major League Baseball Youth Academy Compton Community College District Compton--Los Angeles The proposed project would include the construction of two full-sized baseball fields, one of which is a "show field" resembling a professional baseball field, complete with dugouts, field lights, batter's eye, scoreboard, and a grandstand; one full-sized softball field and a covered pitching/hitting tunnel, in addition, the proposed project includes a 10,000 sf clubhouse that would contain locker facilities, training room, weight lifting room, restrooms, multi-purpose rooms and a library/learning center; a 2,000 sf maintenance facility and surface parking lots providing a total of 80 spaces.	<b>NOD</b>	
2005042130	Hill Slough West Restoration Fish & Game #3 Suisun City--Solano The project will restore tidal wetlands and moist grassland habitat to 200 acres of diked seasonal and perennial wetlands. The wetland restoration will re-introduce tidal action to the site. The desired outcome is a self-sustaining marsh ecosystem created through restoration of natural hydrologic and sedimentation processes and reliance on natural, abiotic and biological succession processes.	<b>NOD</b>	
2005071041	Valencia Water Reclamation Plant Reinforced Soil Erosion Protection Wall - 2005 Repair Los Angeles County Sanitation District Santa Clarita--Los Angeles The project consists of the placement of approximately 6,000 tons of rip-rap at the base of a wall that protects the Valencia Water Reclamation Plant (VWRP) from the Santa Clara River.	<b>NOD</b>	
2005081013	City of Madera Wastewater Treatment Plant Expansion Madera, City of Madera--Madera The main purpose of the proposed project is to expand the City of Madera Wastewater Treatment Plant (WWTP) from an existing permitted treatment capacity of 7.0 million gallons per day (mgd) to 10.1 mgd. This expansion will accommodate the City's projected growth for approximately the next 20 years. The current WWTP consists of a biological secondary treatment process comprised of headworks, primary clarification, biofiltration, secondary clarification, sludge digestion, sludge drying and effluent reclamation. Disinfection treatment is currently not practiced or required at the WWTP. Effluent from the WWTP is discharged to 14 evaporation-percolation ponds located within the facility boundary where most of the wastewater percolates into the underlying groundwater body. Each of the ponds comprises 20 acres and is approximately five feet deep. The WWTP uses approximately six of the ponds at one time for percolation with the remaining ponds leased to a farmer for growing crops for non-human consumption (primarily corn or wheat). Wastewater effluent is used to irrigate the crops via surface irrigation. A sludge centrifuge is currently in service. The dewatered sludge is hauled off-site for final disposal.	<b>NOD</b>	
2005081113	Meyer "A" Street, Westside Industrial Uses Santa Maria, City of Santa Maria--Santa Barbara Proposing a specific list of permitted uses, conditionally allowed uses, and prohibited uses.	<b>NOD</b>	

## CEQA Daily Log

Documents Received during the Period: 10/16/2005 - 10/31/2005

SCH Number	Title / Lead Agency / City--County / Description	Document Type	Ending Date
<b><u>Documents Received on Monday, October 24, 2005</u></b>			
2005081148	Tentative Tract Map No. 33444 La Quinta, City of La Quinta--Riverside The project request is to a subdivide of 317.61 acres into 219 single-family lots, open space and other miscellaneous lots.	<b>NOD</b>	
2005082026	Svetz Tentative Parcel Map - TPM 6-04/05-22 Plumas County Planning Department Quincy--Plumas Tentative parcel map to divide 90 acres into four parcels of 3.0 acres, 3.46 acres, 3.0 acres, and 80 acres for single-family residential use.	<b>NOD</b>	
2005082123	Temporary Closure of Strobridge Avenue at Gary Drive to Exclude Southbound Through-Traffic, Castro Valley Alameda County Public Works Agency --Alameda The project would consist of constructing a raised bulb-out and installing "Do Not Enter" and "Wrong Way" signs on Strobridge Avenue near the southwesterly corner of Gary Drive within the roadway to block southbound traffic from entering the section of Strobridge Avenue to the south of Gary Drive. Northbound through-traffic on Strobridge Avenue at the same location would remain open, and southbound traffic on Strobridge Avenue just south of Gary Drive would remain open to local traffic only. The project would also include roadway striping and the addition of a U-turn lane for southbound vehicles on Strobridge Avenue at the corner of Gary Drive.	<b>NOD</b>	
2005092023	Lake Redding Boat Ramp Rehabilitation Project Redding, City of Redding--Shasta The Lake Redding boat ramp will be widened 10 feet and extended 25 feet into the river to improve low-flow access and to make the facility more user-friendly. Boaters are currently unable to use the ramp during low-flow conditions because the ramp does not extend into the water far enough. Steel pylons associated with the floating aluminum dock will be replaced to provide a stronger anchor system for the dock.	<b>NOD</b>	
2005092054	Ophir Road and Lincoln Boulevard Signal and Intersection Improvements Butte County Oroville--Butte The proposed project is anticipated to construct, as a minimum, an eight phase traffic signal system, widen sections of the existing roadway by placing asphalt concrete over aggregate base, widen one concrete box culvert, complete minor grading at the inlet of the newly extended box culvert, construct left turn pockets and overlay the entire roadway 200-feet back of each stop limit for each leg and throughout the interior of the intersection.	<b>NOD</b>	
2005092057	301 Airport Boulevard Interim Grading Project Burlingame, City of Burlingame--San Mateo The proposed project would consist of the placing of fill, grading, and installation of a new storm drainage system. The project would prepare the site for any potential future development of the site. Any future development would be subject to compliance with the Bayfront Specific Plan.	<b>NOD</b>

2005101113	Seacoast Inn Specific Plan Imperial Beach, City of --San Diego The proposed project will consist of the demolition of a 38 room hotel and parking lot, and the construction of a new hotel on a 1.39-acre site at 800 Seacoast Drive in Imperial Beach. The new hotel is proposed under a Specific Plan to include 78 to 81 rooms, a restaurant, patio dining, pool, meeting rooms, and approximately 105 parking spaces in one level underground. The maximum height of the proposed facility may not exceed four stories or 40 feet, per City of Imperial Beach policy. The project includes constructing a new vertical seawall 35 feet east of the existing timber seawall, with all building and associated improvements east of the new seawall. The project may also include street end improvements at the western terminus of Date Avenue, south of the 1.39-acre lot.	<b>NOP</b>	11/23/2005

2005101115	<p>Estrella Subdivision Calexico, City of Calexico--Imperial</p> <p>The Project proposes to construct 771 residential units, a school, park space, open areas/pedestrian linkages, and streets/parkways. The proposed single-family residential will have a density of 3.8 du/ac, and the multi-family residential will have a density of approximately 20 du/ac. Additionally, a 9 acre open retention basin is proposed as part of the project. The open retention basin will be landscaped, and will include an easement for a major above ground Imperial Irrigation District (IID) power line.</p>	<b>NOP</b>	11/23/2005
2005101117	<p>Cactus Avenue Specific Plan Rialto, City of Rialto--San Bernardino</p> <p>The site is an unincorporated area of the County of San Bernardino within the City of Rialto Sphere of Influence. The proposed project includes a 165-acre Specific Plan for a planned residential community of 726 single-family units with a variety of lot sizes ranging from 4,500 to 20,000 square feet, and approximately 10 acres of neighborhood parks/trails. At present, one third of the planned area is vacant and undeveloped, while the majority of the project site supports a private golf course.</p>	<b>NOP</b>	11/23/2005
2005102102	<p>Calaveras Dam Replacement Project San Francisco, City and County of Fremont, Milpitas--Alameda, Santa Clara</p> <p>Calaveras Reservoir, located on the boundary of Alameda and Santa Clara counties, approximately 10 miles southeast of Fremont, California, is the largest Bay Area reservoir in the San Francisco Public Utility Commission's regional water system. Calaveras Dam is located near a seismically active fault zone and was determined to be seismically vulnerable by the California Department of Water Resources, Division of Safety of Dams (DSOD). DSOC has limited since 2001 the amount of water that can be stored in the reservoir to approximately 40 percent of its former full storage capacity (full storage capacity is 96,850 acre-feet of water) until the safety deficiencies are corrected. The Calaveras Dam Replacement Project, as proposed by the San Francisco Public Utilities Commission, includes replacement of the existing dam with one of equivalent height, restored reservoir storage to its full design level, and improved seismic design. Calaveras dam would be operated to release up to 6,300 acre-feet per year of water for the enhancement of fisheries and the other natural resources of Calaveras and Alameda Creeks. The new dam would be constructed at the downstream edge of the existing dam.</p>	<b>NOP</b>	11/23/2005

2005072138	Shake / Rams / Fiddletown Fire Safe Project Forestry and Fire Protection, Department of --Amador The proposed project is the establishment of Defensible Fuel Zone Profiles for wildfire protection along Shake Ridge Road, Fiddletown Road, Rams Horn Grade and related topographic features the lead agency. The project area includes over 5,400 acres, however, work will not be done on all acres. The project will be implemented on private ownerships within the project area depending on topography and the proximity to the ridges, subdivisions, single residences, and roads identified along the above mentioned ridges and roads.	<b>NOD</b>	
2005081160	Under Ocean Floor Seawater Intake and Discharge Project Long Beach, City of --Los Angeles The Under Ocean Floor Seawater Intake and Discharge Project, proposed by the Long Beach Water Department (LBWD), is intended to determine the feasibility of utilizing a system of subsurface intake and discharge wells for seawater desalination. If determined feasible, this subsurface intake and discharge system can be an alternative to the widely-proposed method of utilizing a coastal power plant's existing once-through cooling water system for seawater desalination.	<b>NOD</b>	
2005108570	Seven Oaks Dam, No. 87-16 Water Resources, Department of, Division of Dams Redlands--San Bernardino Repair the damaged invert of the outlet tunnel using reinforced concrete.	<b>NOE</b>	
2005108600	Edwards Air Force Base Hazardous Waste Support Facility Toxic Substances Control, Department of --Kern, Los Angeles, San Bernardino In accordance with California Health and Safety Code, chapter 6.5, section 25200, and the California Code of Regulations, title 22, chapter 21, the Department of Toxic Substances Control (DTSC) approved a Hazardous Waste Facility Permit (Permit) renewal request submitted by Edwards Air Force Base (EAFB). This Permit authorizes EAFB to operate its Hazardous Waste Support Facility (HWSF), as described below. The only modification to existing facility operations is that EAFB will be accepting additional wastes, of the same waste types, that exhibit the same hazardous waste characteristics, as those currently authorized. There will not be an increase in authorized waste capacity over existing volumes, and existing operational and safety (handling) procedures will remain in effect and unchanged. In addition, EAFB has on file a base-wide mitigation plan for the protection of the environment.	<b>NOE</b>	
2005108601	Removal Action Workplan Approval for Oakdale High School Expansion Toxic Substances Control, Department of Oakdale--Stanislaus This project involves DTSC's approval of a Removal Action Workplan (RAW) which will be carried out at the Oakdale High School Expansion (Site) for the excavation and off-site disposal of approximately 2,600 cubic yards of soil contaminated with chlordane, and lead. During the proposed excavation, no student, faculty, staff, or unauthorized persons will be on the Site. In addition, the area which is subject to this removal action will be surrounded by a six-foot tall chain link fence to prevent unauthorized entry.	<b>NOE</b>

2005108602	<p>NASA Dryden Flight Research Center Shuttle Hazardous Waste Storage Facility, Modification of Closure Plan Toxic Substances Control, Department of Unincorporated--Kern</p> <p>In accordance with California Code of Regulations, title 22, section 66270.42, NASA Dryden Flight Research Center (NASA) revised the Closure/Post-closure Plan for their Shuttle Hazardous Waste Storage Facility (SHWSF). NASA is closing the facility because it will not be needed in the future and has received much less use than originally planned. The facility was used exclusively for storing materials generated during Shuttle de-servicing, after landing, prior to returning it to the Kennedy Space Center (KSC). Because the actual use of the facility was significantly less than what was anticipated when the permit was issued, it is appropriate to reduce the scope of the Closure Plan.</p>	<b>NOE</b>	
2005108603	<p>Water Development Project Sheephole Mountains - S.D. Fish &amp; Game #6 Twentynine Palms--San Bernardino</p> <p>Project involves installation of: (1) small diversion dam (18 in. high x 12 in. wide 15 ft. long); (2) 10,000 gallon storage tank and 2,500 gallon drinker; and (3) 6"-ABS pipeline. The tank and drinker will be buried with an exposed opening (4 ft. x 8 ft.) to the drinker. 200 ft. of pipe will be used to connect the dam to the tank and drinker. Temporary footprint impact is 2.28 acres. Permanent footprint impact is &lt; 0.10 acre.</p>	<b>NOE</b>	
2005108604	<p>Caspar Creek Land Gift Forestry and Fire Protection, Department of --</p> <p>A private land owner has proposed to make a gift to JDSF of the streamside area adjacent to about one mile of Caspar Creek between Highway 1 and JDSF. The area in question is of variable width on either side of the creek, from approx. 200 to 400 feet in total width. The entire area is probably about 40 acres in size.</p> <p>Reasons for accepting the gift:</p> <ul style="list-style-type: none"> <li>- Opportunities for watershed and aquatic habitat study, by making the entire length of Caspal Creek public property.</li> <li>- Opportunities for aquatic habitat restoration.</li> </ul>	<b>NOE</b>	
2005108606	<p>Pacific Energy Horizontal Direction Drilling of Pipe Line #63 at Castaic Creek Fish &amp; Game #5 --Los Angeles</p> <p>The operator proposes to alter the streambed by replacing a portion of Line 63 crude oil pipeline which is exposed within Castaic Creek. The pipeline runs roughly parallel to the eastern side of I-5 through Castaic Creek. The 1800-foot segment of the pipeline will be replaced by horizontal directional drilling. The pipeline will be placed approximately 50 feet below the creek bed. A track excavator will be used to lift the existing pipeline out of the bed of the creek. The horizontal directional drilling equipment will be placed approximately 50 feet from the edge of the bank within the uplands.</p>	<b>NOE</b>

2005101123	<p>Malibu Lagoon Restoration and Enhancement Plan Parks and Recreation, Department of Malibu--Los Angeles</p> <p>The Malibu Lagoon Restoration and Enhancement Plan (Plan) presents a comprehensive approach to restore and enhance the ecological structure and function of Malibu Lagoon to improve Lagoon and coastal water quality, as well as to enhance visitors' experience through improvements to access and interpretation. The Plan has identified a restoration alternative to restore the biological and physical functions of the lagoon, including management of water, habitat and access, as well as a comprehensive monitoring plan, while minimizing impacts to the existing system. The restoration goals for the lagoon consist of increased tidal flushing, improved water circulation, improved coastal water quality, increased holding capacity, reduced predator encroachment, restoration of typical salt marsh hydrology, increased wildlife habitat, creation of nesting island for least terns and western snowy plovers, creation of channel connections to the lagoon, and integration of public access with habitat protection. Major components of the Plan consist of a relocated parking lot and staging area, implementation of Best Management Practices to minimize impacts of storm water runoff, slope improvements to the western edge of the lagoon, improvements to the existing boat house channel, and the creation of a new channel along the southern edge of the west lagoon.</p>	<b>NOP</b>	11/28/2005
2005101125	<p>Ambassador West (Residential, School, and Office Space) Pasadena, City of Pasadena--Los Angeles</p> <p>The project site contains approximately 19.78 acres and is bounded by Orange Grove Boulevard on the west, Green Street on the north, and Del Mar Boulevard on the south. The project seeks entitlement to develop 233 new senior living units and 70 condominiums, as well as to preserve and convert existing structures for 46 apartments, 25,734 square feet of institutional support uses, 7,834 square feet of professional office space and one single-family residence. Development would be achieved through preservation, re-use and new construction with goals of preserving open space, respecting the character and scale of adjacent neighborhoods and historic preservation.</p>	<b>NOP</b>	11/28/2005

<b><u>Documents Received on Thursday, October 27, 2005</u></b>			
2005108617	<p>Lowden Field Wetland Enhancement Project Trinity County --Trinity</p> <p>This project will restore approximately 15 acres of degraded wetland habitat. Using an existing culvert, a portion of the runoff water from intermittent Snipe Gulch Creek will be diverted into an existing degraded emergent palustrine wetland. Snipe Gulch Creek is a tributary of the Trinity River. The amount of runoff water diverted will be controlled by installing a flashboard riser in an existing drainage ditch. This drainage ditch is located between two large spoil banks.</p> <p>Minor earth moving activities will occur to install the flashboard riser. The flashboard riser will have a 48-inch height and a 36-inch width, and will be installed in a drainage ditch that is about 6 feet wide and 3 feet deep. The maximum dimensions of ground disturbance for this project will be approximately 16 feet x 5 feet (80 square feet). At a maximum excavation depth of 5 feet, this would equate to a maximum volume of 400 cubic feet, or about 15 cubic yards. No other ground disturbing activities or construction activities will occur.</p> <p>The ground excavation will be conducted with a backhoe during the dry season, so wetland soils will not be rutted. Any needed fill will be obtained from offsite, and any excess fill will be deposited offsite. The construction site is located in a drainage ditch which flows between two large spoil banks. Construction activities will only occur in this previously-disturbed location. This project will not reach beyond the limits of prior land disturbance. No improvements are required for site access, materials storage, or construction staging. Project construction/installation will occur during daylight hours. All construction/earthmoving will occur under ditch dry conditions.</p> <p>Likely, the increased water presence resulting from the proposed project will enlarge the aerial extent and raise the water table level of the existing wetlands. The wetland dimensions and water table level likely will be returned to dimensions that are similar to their historic, pre-disturbance dimensions. While the construction footprint will be limited to approximately 80 square feet, the resulting wetland enhancement will increase soil saturation and inundation on 15 acres of historic wetlands.</p> <p>A backhoe will be used for excavation of structures and backfilling/leveling. Disturbed areas will be backfilled, leveled, and revegetated as needed.</p> <p>Potential site impacts include minor temporary disturbance of the ground surface within the excavated area and a temporary increase in noise levels during construction. Best Management Practices to reduce erosion and sedimentation have been incorporated into the project design including; project siting, construct methods, and timing.</p> <p>The proposed location is located on State lands and is being constructed with the landowner's permission. Field surveys for State and federally "listed" plants and animals, jurisdictional wetlands and archaeological resources were completed at the proposed project area, with no unavoidable adverse impacts identified. A U.S. Army Corp of Engineers 404 Nationwide Permit has been approved for the project. No mature or scenic trees will be removed.</p>	NOE

<b><u>Documents Received on Thursday, October 27, 2005</u></b>			
	The project purpose is to restore a degraded wetland. The restored wetland is expected to provide improved wildlife habitat and water quality.		
2005108618	Boeing Integrated Defense Systems Specific Plan Power Line Relocation Seal Beach, City of Seal Beach--Orange Relocation of existing power lines within the Boeing Integrated Defense Systems Specific Plan Area in connection with development of Lots 1-13 of Vesting Tentative Tract No. 16375, approved by the City of Seal Beach in August 2003 and California Coastal Commission in August 2004.	<b>NOE</b>	
2005108620	Repair of Eroded Slopes at the Robert B. Diemer Water Treatment Plant (Diemer Plant) Project Metropolitan Water District of Southern California Unincorporated--Riverside As a result of heavy rains during the 2004/2005 season, an approximately 40,000 square foot section of the north slope supporting Basin No. 8 and an approximately 15,000 square foot section of the south slope adjacent to the West Southern Pad at the Diemer Plant have experienced erosion. The erosion must be repaired under a directive from the Division of Safety of Dams (DSOD). The north slope is under DSOD jurisdiction as it provides support for Basin No. 8. The south slope needs repair because the eroded area is immediately adjacent to the blowoff structure for the Yorba Linda Feeder Bypass pipeline and may cause damage to this structure if it is not repaired. The proposed project involves removing existing soil, backfilling and recompact the soil, and hydroseeding all affected areas. Some ruderal vegetation, two small walnut trees, and one pepper tree will be removed as a result of project activities.	<b>NOE</b>	
2005108621	Wall Repairs at the Robert B. Diemer Treatment Plant Finished Water Reservoir Project Metropolitan Water District of Southern California Anaheim, Yorba Linda--Orange Inspection of the Robert B. Diemer Water Treatment Plant (Diemer Plant) Finished Water Reservoir (Reservoir) revealed that there are cracks on the north and west walls. The cracks were caused by external surcharge pressure from an adjacent retaining wall. Currently, the surcharge load on the Reservoir walls has been relieved following cutting and removing a portion of concrete slab outside the walls. Metropolitan proposes to fix over 1,300 feet of cracks by injecting epoxy from inside the Reservoir during the next shut down in March 2006, which will last approximately five days. The proposed procedure for repair is as follows: (1) install scaffolds; (2) route at the cracks by drilling holes along the cracks and installing injection ports; (3) seal the cracks with paste epoxy between the injection ports; (4) inject epoxy through the injection ports; (5) grind out the injection ports; and (6) detail and clean the surface of cracks. All activities will take place within the Diemer Plant.	<b>NOE</b>	
2005108622	Realigning Curve Radii Caltrans #2 --Shasta Caltrans proposes to improve safety at the Buckhorn summit on SR 299 by realigning curve radii. The total accident rate is 3.5 times higher than the statewide average. The project realigns four curves, widens shoulders, and improves drainage. Approximately 2.62 acres of new right of way will be required. Excavation and embankment will have 1.5:1 on the cut and fill slopes. Slopes will	<b>NOE</b>

**Documents Received on Thursday, October 27, 2005**

be revegetated and other erosion control measures implemented. Permits will be required. Noxious weed control will be enforced by agreement between Caltrans and BLM. Due to the Migratory Bird Treaty Act, a tree removal window is in effect beginning September 16 and ending March 15 in the year prior to construction. An optional disposal site is designated at PM 3.7 on SR 299.

2005108623	Sis 5/265 Highway Advisory Radio Caltrans #2 --Siskiyou	<b>NOE</b>
------------	---	------------

The California Department of Transportation proposes to install a Highway Advisory Radio (HAR) tower northeast of the intersection of I-5 and SR-265 in Siskiyou County. This location is just northeast of the Weed Sand House on SR-265 (PM 20.15), which was proposed for the same purpose in 2003. The project entails the installation of a 30-foot tall HAR tower and associated hardware. The tower base will be placed on a 10-foot concrete pad and a new paved access road will be constructed to integrate with an existing maintenance road in the area. New fencing will be installed along the existing Caltrans right-of-way (ROW) and a 70-foot by 70-foot area of vegetation will be removed beneath the tower in order to facilitate a metal grid that will be placed below grade. In addition, trenching activity may occur beyond the Caltrans ROW boundary in order to access a nearby utility pole. An environmental review was conducted to determine if the project would result in an adverse effect upon the environment. The review consisted of field reviews, as well as database inquiries for sensitive biological and archaeological resources. No sensitive archaeological or biological resources were identified within or adjacent to the project limits. The project site is not listed on the April 1998 State List of Hazardous Waste Sites, also referred to as the "Cortese List." Based on these studies, it was determined that the project would not result in a potentially significant adverse effect upon the environment. This project meets the requirements of a Class I categorical Exemption as it initials the minor alteration of an existing state highway facility. No permits will be required for the project.

2003082100	Union City Intermodal Passenger Rail Station Project Union City Union City--Alameda	<b>EIR</b>	12/12/2005
------------	---	------------	------------

The proposed project would reroute current and future Capitol Corridor passenger rail service from the Niles Subdivision of the Union Pacific Railroad (UPRR) to the Oakland Subdivision of the UPRR between Hayward and Fremont to allow Capitol Corridor inter-city rail service trains to access the planned City of Union City Intermodal Station. The proposed project would also allow future Dumbarton trains to access the proposed Union City Intermodal Station and utilize one of the proposed layover yards. The proposed project corridor extends from Industrial Boulevard in the north to the UPRR line between Alameda Creek and Peralta Boulevard in the south.

2004062016	<p>Baldwin Hallwood Mine Expansion Yuba County Marysville--Yuba</p> <p>The proposed operation (Project) consists of sand and gravel extraction in a manner similar to that performed at Baldwin's existing Hallwood Plant. The mined materials will be processed at Baldwin's existing aggregate plant immediately south of the Project Site's southern boundary. This project is an expansion of an existing quarry. Baldwin's application proposes one vertical phase and 11 lateral phases with active mining at the project site for 22 to 44 years.</p>	<b>EIR</b>	12/12/2005
2005041103	<p>Mojave Water Agency Water Supply Reliability and Groundwater Replenishment Program Mojave Water Agency Yucca Valley, Victorville, Hesperia, Apple Valley, Adelanto, ...--San Bernardino</p> <p>Consistent with its 1994 Regional Water Management Plan and recently adopted Regional Water Management Plan, Mojave Water Agency (MWA) proposes to prepare a project-specific Environmental Impact Report (EIR) to consider a Water Supply Reliability and Groundwater Replenishment Program (Project Under Consideration). The Project Under Consideration is intended to:</p> <ul style="list-style-type: none"> <li>* Enhance water supply reliability;</li> <li>* Increase overall groundwater replenishment and offset groundwater overdraft;</li> <li>* Enhance MWA's ability to manage to improve groundwater quality;</li> <li>* Raise groundwater levels at selected sites to enhance riparian vegetation; and</li> <li>* Provide opportunities for MWA to engage in innovative water banking and water exchange programs.</li> </ul> <p>To accomplish these objectives, MWA is considering utilizing existing facilities, enhancing existing facilities, and/or constructing new facilities to increase capacity for groundwater recharge and extraction. In conjunction with these facilities, MWA is considering modifying its current operations to include water banking programs and/or water exchange programs to enhance operational flexibility and water supply reliability.</p>	<b>EIR</b>	12/12/2005
2003112060	<p>Delta Water Supply Project Stockton, City of Stockton--San Joaquin</p> <p>The Delta Water Supply Project (DWSP) is a new supplemental water supply for the City of Stockton Metropolitan Area (COSMA). The City seeks to secure a long-term supplemental surface water supply to use conjunctively with its local groundwater resources and other existing surface water sources. The City has applied to the State Water Resources Control Board (SWRCB) for a water rights permit to divert water from the Sacramento-San Joaquin Delta. The City's water rights application addresses a long-term planning horizon through the year 2050, requesting an ultimate diversion to 125,900 AF/year. Proposed DWSP facilities include: a new water intake facility on the southwest tip of Empire Tract on the San Joaquin River, transmission pipelines along Eight Mile Road and other city streets to connect to the existing water distribution system, and a water treatment plant (WTP), located on Lower Sacramento Road just north of the current City boundary. The DWSP would be implemented in phases as the need for additional treated water supply develops. This environmental document provides a project-level evaluation of the initial DWSP (30 million gallons per day (mgd) or 33,600 acre-feet per year) and a programmatic review of the entire DWSP program, with an ultimate treatment capacity of XXX mgd (125,900 acre-feet/year). After the initial phase the City will consider the need to include an Aquifer Storage and Recovery (ASR)</p>	<b>FIN</b>

	District's (District) reliability over the next 25 years in conjunction with regional plans being developed by the San Diego County Water Authority and the Metropolitan Water District of Southern California.		
2005102132	Coyote Hills General Plan Amendment, Rezone, Subdivision Map, and Affordable Housing Plan Sacramento County --Sacramento The project consists of the following entitlement requests from Sacramento County: 1. A General Plan Amendment from General Agriculture (80-acre minimum) to General Agriculture (20-acre minimum) for approximately 233 acres. 2. A Rezone from AG-80 and AG-80(F) to AG-20 and AG-20(F). 3. A Subdivision Map to create 11 lots in the AG-20 zone. 4. An Affordable Housing Plan consisting of the payment of In-Lieu and Affordability fees.	<b>NOP</b>	11/29/2005
2005102134	Use Permit 05-010 and Reclamation Plan 05-001 - Shasta Ranch Mining and Reclamation Shasta County --Shasta the request is for approval of a use permit and reclamation plan for a gravel operation on 268 acres of three parcels totaling 660 acres. Approximately 3.43 million cubic yards of overburden and 6.06 million cubic yards of soil and gravel would be excavated. Gravel would be washed, screened, crushed, stockpiled and loaded for off-site transport. The project would generate an average of 64 and a maximum of 120 truck round trips per day. The project would operate until 2035. The proposed use after reclamation would be agriculture, ponds and open space preserves.	<b>NOP</b>	11/29/2005
2003061129	New K-6 Elementary School Panama-Buena Vista Union School District Bakersfield--Kern Construction of a new K-6 elementary school on an 10.81-acre site to include: 22 Classrooms, Administration, Library, Computer Lab, Multi-purpose, Storage and support services. The project includes landscaping, irrigated turf, playground, onsite parking for staff and visitors, and provisions for bus loading and unloading. The plan provides for portable classrooms to be added later if needed.	<b>Neg</b>	11/29/2005

2005111008	Sam's Club; Conditional Use Permit 05-9 and Building Permit (Demolition Permit) Hemet, City of Hemet--Riverside The proposed project will result in the construction and operation of an approximate 135,300 sq. ft. of net rentable general retail store (Sam's Club) and a net 12-pump gasoline station within an existing shopping center. The project will entail the demolition of an existing, unoccupied, 130,226 sq. ft. retail store and construction of the new retail store at the same location. It will also locate a gasoline station in an area that is currently part of a parking lot. The project includes improvements to Gilmore Street, modification to two access points on Gilmore Street and addition of an access point on Gilmore Street to serve the proposed gasoline station.	<b>Neg</b>	12/02/2005
1995053061	City of Woodland Permanent Urban Limit Line Woodland, City of Woodland--Yolo The proposed project would create a permanent Urban Limit Line for the City of Woodland.	<b>Oth</b>	
1997071087	Santa Ana River Project - Prado Dikes U.S. Army Corps of Engineers Corona--Riverside, Orange, San Bernardino Construction of two dikes on the perimeter of Prado Basin to provide continued flood protection to surrounding homes and infrastructure, as the basin expands.	<b>SIR</b>	12/14/2005
1998111091	Triangle Ranch Project, Project No. 97-178, Tract No. 52419 Los Angeles County Department of Regional Planning Agoura Hills--Los Angeles Project consists of the subdivision of the 320.3-acre project site into 71 single-family residential lots, plus landscape and open space lots. This Revised Project Design to the Draft EIR is prepared as alternative to the previously proposed project analyzed in the DEIR.	<b>SIR</b>	12/14/2005
2005081131	Well 26A Disposable Resin Ion Exchange System for Uranium Removal Project Mission Springs Water District Desert Hot Springs--Riverside The proposed project is the operation of the Well 26A Resin Ion Exchange system. The well and resin ion exchange unit have already been installed at the project site. Thus, it is the groundwater extraction, treatment to remove uranium, and delivery of the treated water to the District's potable water distribution system that constitutes the proposed project. Water from Well 26A will be pumped through the onsite resin ion exchange unit where the uranium will bind with the resin, thereby allowing the water leaving the unit to meet the California Department of Health Services Drinking Water standards. The treated water will be pumped into the District's water distribution system for potable water use. When the resin approaches its removal capacity, the resin will be removed and replaced with fresh resin. The contaminated resin will then be properly disposed of.	<b>NOD</b>	
2005091057	Templeton Community Services District Percolation Pond Expansion Project Templeton Community Services District --San Luis Obispo Construction of 2.0 acre wastewater percolation pond on site with existing percolation ponds.	<b>NOD</b>

2005091126	<p>Disinfection By-products Control Program Antelope Valley-East Kern Water Agency Palmdale--Los Angeles, Kern</p> <p>AVEK operates and maintains four potable water treatment plants (WTPs) known as the Acton, Eastside, Quartz Hill and Rosamond WTPs located in northeastern Los Angeles County and southeastern Kern County. The proposed project includes new and modified facilities needed to convert the disinfection method used at all four WTPs from chlorination of ozonation and chloramination to reduce disinfection by-products. The facilities proposed at the four WTPs include: facilities to store liquid oxygen and convert liquid oxygen to gaseous oxygen, ozone generation building, ozone contact basins, filters, chlorine contact basin, chemical storage and feed facilities, and modifications to internal access roads. The proposed modifications to the Acton, Eastside, and Rosamond WTPs would not alter the design capacity of these three plants. The proposed retrofit of the Quartz Hill WTP includes additional modifications needed to increase the plant's design capacity from the existing 65 to 90 million gallons per day. Additional improvements proposed for the Quartz Hill WTP include modifications to the flocculation/sedimentation basins and construction of a new washwater recovery basin, and additional storage facilities for alum and sodium hypochlorite.</p>	<b>NOD</b>

Two other tenants located in the existing building where the proposed baseball school will be located have parking agreements with off-site facilities.	<b>NOE</b>	
2005108677	Panattoni Boundary Line Adjustment Sacramento County Dept. of Environmental Review Sacramento--Sacramento The proposed project consists of a Boundary Line Adjustment to reconfigure the lot lines among four parcels in the SC (T) zone.	<b>NOE</b>	
2005108678	4301 North Freeway Boulevard Tentative Parcel Map and Special Review of Parking (Cross Access) Sacramento County Dept. of Environmental Review --Sacramento The proposed project consists of a Tentative Parcel Map to divide 2.0 +/- acres into two industrial lots in the MP zone. The project also includes a Special Review of Parking (Cross Access) in order to share parking between the existing building and the proposed building on the project site.	<b>NOE</b>	
2005108679	American River Health Pro Credit Union Use Permit Sacramento County Dept. of Environmental Review Rancho Cordova--Sacramento The proposed project consists of a Use Permit to allow a freestanding sign to exceed the size limitations in the Special Sign Corridor on a parcel located in the LC zone.	<b>NOE</b>	
2005108783	Blythe-Mesa Ranch: Well 03 Health Services, Department of Blythe--Riverside The project consists of replacing Well 01. The existing Well 01 must be replaced because it no longer has adequate capacity to meet system demands and the water it produces exceeds the secondary MCL for iron and manganese. Previously, two wells fed the Blythe-Mesa Ranch water system, one that resides on this project and the other at the Palo Verde College campus near Arrowhead Blvd. and 6th Avenue. The College Well initially produced about 2,500 gpm, but had lost production capacity and was only producing about 1,000 gpm and was pumping sand into the system. The well casing finally collapsed and is no longer in use. Initially, it was planned to replace Well 01 with the new Well 03 then do a temporary shutdown of the College Well for investigation and probable repairs. However, due	<b>NOE</b>

to the loss of the College Well, Well 01 has not been destroyed yet and both Well 01 and Well 03 are currently providing water to the Blythe-Mesa Ranch system. Upon completion of a replacement well for the College Well, Well 01 will be destroyed. Water quality for required treatment will be monitored with the new well and treatment will be provided as necessary.

2005108784	<p>Yuba City Groundwater Plant #3 Facilities Replacement Project Health Services, Department of Yuba City--Sutter</p> <p>Project consists of the replacement of the water supply pump, greensand filter, and backwash tank, and the addition of a new 85 square foot chemical storage building. The replacement filter (pyrolusite) will provide improved removal of iron, manganese, and arsenic, and meet the new Maximum Contaminant Level for arsenic. The capacity of the pump and treatment plant will increase from 500 gpm to 1200 gpm, but the footprint of the treatment facility as well as the overall capacity of the water system will not increase.</p>	<b>NOE</b>
